

Cambium Networks™

Campus Monitoring Made Easy With cnVision Video Surveillance

Video surveillance is proven to provide a safe campus environment for students, faculty, staff and the surrounding community. The quicker you are able to deploy cameras throughout your campus and in an affordable manner, the quicker you achieve your peace of mind. While connecting cameras with wired solutions is great, it is not always the most affordable or quickest way. Imagine digging up that newly resurfaced parking lot or the playground. The easiest and quickest way to achieve your piece of mind is deploying your cameras with wireless backhaul that is purpose-built for CCTV.

Not all wireless video communications solutions are built the same. Reliable and consistent transmission, ease of use, and integration with leading-edge VMS systems make cnVision the ideal platform to deploy cameras quickly and easily throughout the campus. From the athletic field to the parking lot, cnVision can make camera installation and management a breeze. Rapidly build out your video surveillance coverage with proven wireless connectivity from an industry leader.

Backed by our 24/7 support and three-year warranty, cnVision solutions work with your cameras and VMS systems to provide consistently reliable performance when and where it's needed. While you monitor the halls, cnVision will provide the connection you need to securely monitor an entire campus.

3 REASONS WHY YOU SHOULD CHOOSE Cambium Networks

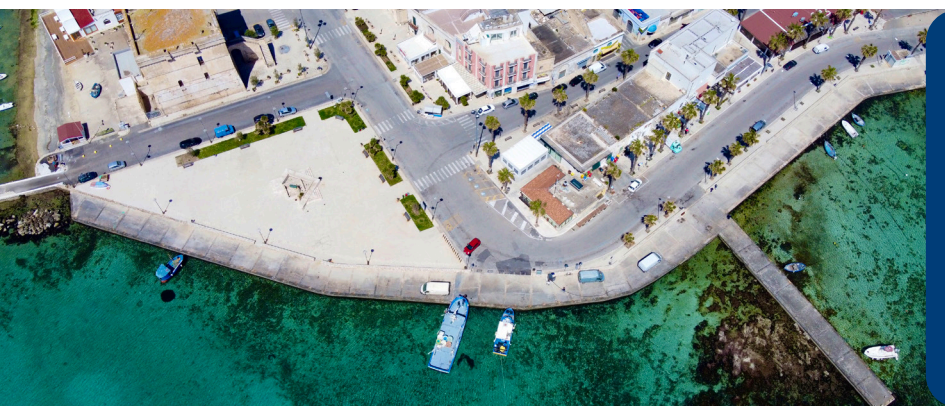

- 1 Ease in planning, installation, management and integration with leading camera and VMS vendors
- 2 Secure communication
- 3 Low total cost of ownership

"Without interference, latency, delays or signal loss, the solution allowed Formula One to have high-quality images to monitor the safety of visitors to the event. Cambium Networks has robust, flexible and manageable communications solutions that ensure complete confidence in the solutions Seal Telecom provides to its customers."

- CRISTIANO FELICISSIMO, PRE-SALES DIRECTOR LATAM, SEAL TELECOM

	Ubiquiti	cnVision	Advantage cnVision
VMS Integration	<ul style="list-style-type: none"> No features designed specifically for video integrators 	<ul style="list-style-type: none"> Integrates with existing VMS. Reduce management time by viewing network client status alongside camera payload data 	✓
ONVIF Client	<ul style="list-style-type: none"> No features to help video integrators segment and isolate faults in end-to-end solution 	<ul style="list-style-type: none"> cnVision Hub and Clients support ONVIF. Cameras capable of ONVIF can be discovered, and the video stream is displayed in the Hub/Client UI for further troubleshooting 	✓
Security	<ul style="list-style-type: none"> Basic Wi-Fi security with Open SSIDs, leaving network hardware vulnerable to access by unknown devices 	<ul style="list-style-type: none"> Proprietary protocol AES 128/256 encryption 	✓
Warranty and Support	<ul style="list-style-type: none"> Crowdsourced or online support Typically a one-year warranty 	<ul style="list-style-type: none"> 24/7 support Three-year warranty 	✓

“We are very pleased with the overall result of the installation. The equipment has ensured both the low environmental impact we wanted, and the operational efficiency and performance we needed.”
- DR. SALVATORE ALBANO, MAYOR, PORTO CESAREO

SIMPLE, SECURE AND RELIABLE SOLUTIONS THAT ARE PURPOSE-BUILT FOR WIRELESS VIDEO SURVEILLANCE
