

Cambium Networks and Nomadix

Today's travelers are looking for convenience throughout their journeys, and hotels can exceed those expectations by providing a smart and fully connected experience. From digital check-ins, mobile keys, streaming video content, to food and beverage ordering, technology can seamlessly complement staff and instantly connect guests with digital services to enhance their stays.

Central to this experience is a solid internet connection, a key driver in positive guest satisfaction scores. Getting guests connected quickly helps them enjoy all of the services the hotel has to offer.

Pairing access points from Cambium Networks with Nomadix gateways and the Nomadix Hotel Portal offers hotels highly reliable, fast and secure internet access. This combined solution provides the necessary administrative controls to effectively meet hotelier and guest expectations.

HOW IT WORKS

Nomadix makes the setup process for hotels simple. "Set and forget" functionality requires configuration only once during initial setup with no need for future administration. Cambium Networks further enhances the functionality of the Nomadix gateway by providing the wireless connection for guests and staff. Managed service providers that utilize Nomadix and Cambium only need to complete the network with the switch fabric to gain the benefits of the solution.

Once initial access is configured, access points and the health of the Wi-Fi network can be managed using the Nomadix Hotel Portal. Easily monitor the network via the dashboard, which provides status and reports for the various network devices to optimize the network and mitigate any downtime.

For guests, they simply authenticate and connect their devices to the fast and secure internet they expect. This enables them to use mobile keys, stream shows, order room service, engage with in-room assistants, and book hotel amenities - or they may just want fast service to work on their laptops.

KEY FEATURES

- Scalable to accommodate small- to large-size properties - from boutique B&Bs to resorts to convention centers
- Robust cloud-based authentication and controls for configuration and management of visitor-based networks
- Template creation for branded guest authentication portal to connect to the hotel's look and feel
- Bandwidth management, allocation and controls to ensure users get the right bandwidth levels with unused bandwidth redistributed to optimize the guest experience
- Ability to connect to PMS systems to validate checked-in guests and charge fees for internet usage if required
- Property-specific ticket and reports for real-time guest insights
- Conference tool that allows administrators to set up events, configure special access codes and offer event-specific landing pages

APPLICATIONS

The Cambium Networks and Nomadix solutions are ideal for the hospitality industry, providing the desired bandwidth and management to accommodate dozens to thousands of rooms and devices accessing the network at the same time. In equipped properties, guests can:

- Stream TV shows easily from their mobile devices directly on the in-room TVs
- Book hotel amenities, including spa appointments, dinner reservations, and cabanas or tables at the pool
- Check-in, check-out, access mobile keys, order towels - all from their personal devices
- Use smart in-room devices to turn down lighting, open curtains and adjust thermostats

All of the above can be easily monitored and managed, prioritized for loyalty members, controlled for security and privacy, and optimized for better ROI.

FAST, SECURE NETWORK CONNECTION TO EVERY ROOM.

Delight customers with a connected experience, just like they enjoy at home.

Scalable:

Offering the scalability to accommodate all sizes of networks and the flexibility to meet guest and hotelier needs

Guest Satisfaction:

Meeting and exceeding expectations of guests when streaming content, accessing hotel accommodations, and other common tasks including video conference calls, email and web browsing

Secure:

Providing access for guests, staff, maintenance, IoT devices and video surveillance cameras with the highest levels of security and privacy

Control:

Achieving unparalleled reliability and ease of management by pairing these solutions with responsive and dedicated support

Cost-Effective:

Combining robust, high-value solutions that offer an optimal internet experience, providing hoteliers with a strong ROI

Boost Loyalty:

With this truly connected experience, guests will choose to return for the same conveniences and comfortable experiences when they travel for business or leisure

SUMMARY

With more than 20 years of experience, Nomadix enables over 5 million daily internet connections, in over 150 countries. With a global reputation for unparalleled reliability and ease of management, its patented gateways are the industry standard in hospitality, used by tens of thousands of properties and supporting millions of rooms worldwide. The company provides hotel owners, brands, property management groups and managed service providers (MSPs) with a suite of solutions that will enhance the guest and tenant experience, today and into the future. From TV casting, to secure Wi-Fi, to PBX – travelers can feel at home wherever they go. For more information, visit nomadix.com.
