Service Provider Toolbox

Create Superior Wireless Connections for People, Places and Things

Deliver wireless gigabit connectivity where you need it at a fraction of the cost of fiber. With Cambium Networks' portfolio of solutions, you can tailor the network to meet your customers' needs. Software-defined radios (SDR) enable you to upgrade capabilities as your end devices evolve. Easy-to-use planning tools let you design fixed wireless and/or Wi-Fi networks with confidence. View the end-to-end network with cloud-based management to maximize availability and minimize maintenance costs. All solutions are backed by Cambium's global organization that provides support and services designed to meet your business needs.

TECHNOLOGIES

Employ the best technologies to yield optimal coverage to provide the highest business value.

- Licensed Spectrum
- Unlicensed Spectrum
- Wi-Fi 6
- MU-MIMO
- Smart Antenna
